SIEMENS AI LAB - WORKING STUDENT PROJECT MGMT & COMMUNICATION (f/m/x)

In light of the rapid advances in current machine learning research, countless industrial applications for modern AI systems are revealing themselves today. At Siemens Corporate Technology we know that, to deliver impactful products based on cutting-edge technology, one needs to provide a creative environment driven by interdisciplinary collaboration – the Siemens AI Lab.

Siemens AI Lab is a co-research space, perfectly located at the very heart of Munich – and we want you!

We offer you the opportunity to work within our Siemens AI Lab core team. You will be a valuable part of a high-performing, interdisciplinary team with your own areas of responsibility.

Requirements:

- Student in at least the third semester with relevant internships
- Enthusiasm for Artificial Intelligence
- Creative talent for organization and a „can-do" attitude
- Independent, dedicated and solution-oriented approach
- Ability to work collaboratively in a team environment
- Strong communication skills
- Fluency in German and English
- Excellent MS Office skills (Outlook, PowerPoint, Excel, Word)

Responsibilities:

- Support the AI Lab management team in their daily business
- Create effective communication materials, e.g. reports and documents
- Organize events, workshops and innovative competitions (e.g. Hackathons)
- Assist in stakeholder management: coordinate external partners and internal experts
- Run market & Technology research

Start: As soon as possible

Working time: At least 5 months, 15 - 20 hours / week

Employment type: Working student

Curious? We look forward to receiving your application:
